PROFESSIONAL SUMMARY

Staff Software Engineer and Engineering Lead with 15+ years building software, including at **Google and AWS**. I now lead engineering for Elaiia, a **customer-facing Gen AI simulation platform**, where I've shipped multi-agent workflows and the validation, tracing, evals, and cost controls they need in production. I also **co-founded and shipped Notamify**, an AI pre-flight briefing product.

PROFESSIONAL EXPERIENCE

Delta Labs AG

06.2026 – Present

Staff Software Engineer, Engineering Lead

Zurich, Switzerland

- **Digital twin studies:** Lead engineering for Elaiia, where customers run studies with digital AI twins as respondents, ask follow-up questions, and use the resulting reports to guide business decisions. Built its multi-agent simulation pipelines with LangGraph, FastAPI, and Next.js.
- **AI quality:** Set production inference testing standards and built a multi-stage validation layer with deterministic schema and semantic checks plus an LLM-as-a-judge review for generated reports.
- **Observability & evals:** Added end-to-end Langfuse tracing for output quality, latency, and cost. Built a framework for research teams to compare models and prompts.
- **Production performance:** Improved orchestration and caching to manage latency and LLM inference costs.
- **Product telemetry:** Built Grafana dashboards from production data for CEO/CPO roadmap decisions and automated alerts for inactive clients to support retention work.

TECH: LangGraph, LangChain, Langfuse, Grafana, FastAPI, Python, TypeScript, Next.js, PostgreSQL

Google

11.2021 – 05.2026

Software Engineer

Zurich, Switzerland

- Built Product Diagnostics for Merchant Center Next so merchants could monitor problems with their product catalogs.
- **Product launch:** Led the design and implementation of authentication and access management for Business Manager, a hub for first- and third-party merchant apps that launched to more than 300,000 monthly active users.
- Worked on UI integrations connecting Merchant Identity with Shopify, YouTube Shopping, Google Ads, and Google Business Profile.
- **AI Support Agent (20% project):** Built an internal prototype for G-Tech support teams that automated about 70% of responses to technical customer inquiries. It gained traction and visibility and was prioritized to become a core part of a user-facing AI support agent.

TECH: Java, Dart, Angular, Kotlin, SASS, ADK, Bazel

Amazon Web Services (AWS)

08.2020 – 10.2021

Software Development Engineer II

Berlin, Germany

- Led work in the AWS Customer Experience team to simplify end-to-end, canary, and integration testing for AWS Console pages.
- Built a WebDriver testing framework that partner teams could use with their own console apps.
- Helped build a shared feature flagging tool for internal rollouts and experiments.

TECH: JavaScript, TypeScript, React, WebdriverIO, AWS Services

EF Education First

07.2019 – 07.2020

Lead Software Engineer & Platform Team Lead

Zurich, Switzerland

- **Production scale:** Designed the move to Cloudflare Workers for all EF product page traffic, about 13 million requests a day, and worked directly with Cloudflare on the migration.
- Led a four-person platform team supporting internal teams through CI/CD and deployment automation, plus cross-team projects including an internal link shortener and global proxy configuration on Cloudflare Workers.
- Helped build a shared React component library with EF Global Creative Studio that was adopted companywide.

TECH: TypeScript, Go, AWS, Terraform, Cloudflare Workers, React, GraphQL

R3PI

09.2018 – 04.2019

Software Development Engineer / Front-end Lead

Zurich, Switzerland

- Led a three-person frontend team delivering an automotive insurance claims platform for Solera.
- **Production optimization:** Cut bundle size by 25% and used DataLoader caching to avoid redundant GraphQL data fetches.
- Built AR navigation prototypes.

TECH: TypeScript, JavaScript, Node.js, React, GraphQL, SASS

EF Education First

Senior Front-end Engineer

- Led frontend work on an e-commerce JAMstack migration. Standardized Docker development environments and Jest/Puppeteer test suites.

TECH: JavaScript, Vue.js, Node.js, Docker, SASS, PostgreSQL

12.2017 – 08.2018

Lucerne, Switzerland

IS Engineering

Chief Software Architect

- First engineer:** Built a distributed factory tracking and analytics system from scratch and deployed it to production at more than 10 glass plants worldwide.
- Defined requirements with customers, oversaw handover, and integrated external systems with partners.

TECH: Ruby on Rails, PostgreSQL, MongoDB, Docker, Vue.js, Node.js

01.2014 – 12.2017

Zug, Switzerland

Early Career Roles (PGS Software · sharewise · CMS Mirage)

Software Developer (Full-Stack / Frontend / Backend)

- Built web apps and services, including real-time WebSocket updates, fleet reports, and user interfaces.

TECH: Ruby on Rails, Java, JavaScript, Node.js, PostgreSQL, Git

05.2009 – 12.2013

Wrocław, Poland

SELECTED PROJECTS & INDEPENDENT ENGINEERING

Notamify

notamify.com ↗

2023 – 2024 (Stepped down)

Co-Founder & CTO

- Shipped AI product:** Co-founded Notamify, which turns raw NOTAM notices into structured, readable pre-flight briefings for pilots and aviation professionals.
- LLM pipeline:** Built data ingestion, semantic LLM parsing, and backend services on GCP with PostgreSQL. Stepped down in 2024.

TECH: Python, FastAPI, PostgreSQL, GCP, Docker, OpenAI

Practically Agents

practicallyagents.com ↗

2025 – Present

Founder & Technical Author

- Write about multi-agent orchestration, validation, evals, and agent interfaces based on production AI engineering work.
- Build and open-source agent workflow prototypes to test the patterns I write about.

TECH: LangChain, LangGraph, Google ADK, Astro, TypeScript, Python

TECHNICAL SKILLS & COMPETENCIES

PRODUCTION GEN AI

LLM orchestration · Multi-agent workflows · Output validation · Evals & benchmarking · Tracing & observability · LangGraph · LangChain · Google ADK

LANGUAGES

TypeScript · JavaScript · Python · Go · Java · Dart · Kotlin · Ruby

DATABASES & STORAGE

PostgreSQL · Redis · MongoDB · Vector Databases

ARCHITECTURE & CLOUD

AWS (Lambda, DynamoDB, CDK, S3) · GCP · Cloudflare Workers · Terraform · Docker · CI/CD Pipelines

WEB & FULL-STACK

Next.js · React · Angular · FastAPI · Node.js · Vue.js · Tailwind CSS · REST & GraphQL

EDUCATION

Higher School of Information Technology and Management "COPERNICUS"

Studied Computer Science (no degree)

2007 – 2009 · Wrocław, Poland

University of Wrocław

Studied Archeology (no degree)

2001 – 2003 · Wrocław, Poland

CERTIFICATIONS

Agentic System Design

Educative

Issued 02.2026

AWS Certified Solutions Architect – Associate

Amazon Web Services (AWS)

Issued 12.2019

Mobile Web Specialist

Google Developers

Issued 01.2019
