PROFESSIONAL SUMMARY

Staff Software Engineer and Engineering Lead with over 15 years of experience architecting distributed systems, cloud infrastructure, and AI-driven platforms. Proven track record at Google and AWS driving ecosystem connectivity, platform reliability, and high-scale traffic management. Active AI thought leader (Practically Agents) and builder combining deep multi-agent systems architecture with pragmatic 0-to-1 product execution.

TECHNICAL SKILLS & COMPETENCIES

AI & AGENTIC SYSTEMS

LangChain · LangGraph · ADK (Agent Development Kit) · LLM Orchestration · Multi-Agent Architectures · Evals & Benchmarking

LANGUAGES

TypeScript · JavaScript · Python · Go · Java · Dart · Kotlin · Ruby

DATABASES & STORAGE

PostgreSQL · Redis · MongoDB · Vector Databases

ARCHITECTURE & CLOUD

AWS (Lambda, DynamoDB, CDK, S3) · GCP · Cloudflare Workers · Terraform · Docker · CI/CD Pipelines

WEB & FULL-STACK

Next.js · React · Angular · FastAPI · Node.js · Vue.js · Tailwind CSS · REST & GraphQL

PROFESSIONAL EXPERIENCE

Delta Labs AG

06.2026 – Present

Staff Software Engineer, Engineering Lead

Zurich, Switzerland

- **Multi-Agent Architecture:** Lead engineering for Elaiia (AI market research platform); architected distributed simulation pipelines with LangGraph, FastAPI, and Next.js, optimizing orchestration latency, caching, and LLM inference costs.
- **AI Validation & Quality:** Established production AI inference testing standards; engineered multi-stage validation layer combining deterministic schema/semantic guardrails with an LLM-as-a-judge review mechanism to eliminate hallucinations.
- **AI Observability & Evals:** Implemented Langfuse for end-to-end LLM tracing and latency/cost monitoring; designed an experimentation framework enabling research teams to rapidly benchmark models and iterate on prompt strategies.
- **Product Telemetry & Retention:** Built centralized Grafana BI dashboards connecting production data sources to steer CEO/CPO strategic roadmap decisions; configured automated inactive-client alert pipelines to proactively prevent churn.

TECH: LangGraph, LangChain, Langfuse, Grafana, FastAPI, Python, TypeScript, Next.js, PostgreSQL

Google

11.2021 – 05.2026

Software Engineer

Zurich, Switzerland

- **Merchant Center Next:** Developed the Product Diagnostics frontend for the revamped Merchant Center Next, delivering critical insight tools for merchants to monitor catalog health at Google scale.
- **Business Manager:** Led technical design and implementation of user management (Authentication & Authorization) for Business Manager, a central hub allowing merchants to manage 1st- and 3rd-party applications (launched to >300k MAU).
- **Ecosystem Integrations:** Led UI/features team implementing first-party linking between Merchant Identity and major platforms (Shopify, YouTube Shopping, Google Ads, Google Business Profile).
- **AI Support Agent (20% Project):** Designed and developed an AI-powered agent to assist G-Tech support teams, automating >70% of responses to technical customer inquiries.

TECH: Java, Dart, Angular, Kotlin, SASS, ADK, Bazel

Amazon Web Services (AWS)

08.2020 – 10.2021

Software Development Engineer II

Berlin, Germany

- **Testing Infrastructure (AWS CX):** Led initiative within central AWS Customer Experience (CX) team to simplify end-to-end testing (functional, canary, integration) for AWS Console product pages.
- **Plug-n-Play Framework:** Delivered plug-and-play testing solution based on WebdriverIO protocol, enabling partner teams to seamlessly adopt automated testing for their specific console applications.
- **Internal Tooling:** Contributed to development of centralized feature flagging solution, empowering internal teams to manage feature rollouts and experiments effectively.

TECH: JavaScript, TypeScript, React, WebdriverIO, AWS Services

EF Education First

Lead Software Engineer

- Traffic Management:** Designed architecture and migration path for Cloudflare Workers handling 100% of EF product page traffic (~13M req/day); served as primary technical contact with Cloudflare.
- Team Leadership & Design System:** Led 4-person platform infrastructure team for CI/CD automation and co-developed company-wide React component library with EF Global Creative Studio.

TECH: TypeScript, Go, AWS, Terraform, Cloudflare Workers, React, GraphQL

07.2019 – 07.2020

Zurich, Switzerland

R3PI

Software Development Engineer / Front-end Lead

- Frontend Lead & Prototyping:** Led 3-person team developing CRM client app and built AR navigation prototypes. Optimized production builds by 25% and eliminated redundant roundtrips with DataLoader caching.

TECH: TypeScript, JavaScript, Node.js, React, GraphQL, SASS

09.2018 – 04.2019

Zurich, Switzerland

EF Education First

Senior Front-end Engineer

- Led front-end development for greenfield e-commerce JAMstack migration; standardized team Docker environments and Jest/Puppeteer test suites.

TECH: JavaScript, Vue.js, Node.js, Docker, SASS, PostgreSQL

12.2017 – 08.2018

Lucerne, Switzerland

IS Engineering

Chief Software Architect

- Designed and implemented distributed Industry 4.0 factory tracking & analytics system; oversaw commissioning across 10+ glass plants globally.

TECH: Ruby on Rails, PostgreSQL, MongoDB, Docker, Vue.js, Node.js

01.2014 – 12.2017

Zug, Switzerland

Early Career Roles (PGS Software · sharewise · CMS Mirage)

Software Developer (Full-Stack / Frontend / Backend)

- Delivered web applications and services including real-time WebSocket push systems, fleet management reporting, and frontend user interfaces.

TECH: Ruby on Rails, Java, JavaScript, Node.js, PostgreSQL, Git

05.2009 – 12.2013

Wrocław, Poland

SELECTED PROJECTS & INDEPENDENT ENGINEERING

Practically Agents

practicallyagents.com ↗

Founder & Technical Author

- AI Engineering Publication:** Author in-depth architectural teardowns and production blueprints on multi-agent orchestration (LangGraph, Google ADK), evals, and agentic UI.
- Hands-on Prototypes:** Design and open-source experimental multi-agent workflows exploring state machines, tool synthesis, and agent communication protocols.

TECH: LangChain, LangGraph, Google ADK, Astro, TypeScript, Python

2025 – Present

Notamify

notamify.com ↗

Co-Founder & CTO

- Aviation Intelligence SaaS:** Built an AI platform converting raw, cryptic NOTAM notices into clear, structured pre-flight briefings for pilots and aviation professionals.
- Architecture:** Designed automated data ingestion, semantic LLM parsing pipeline, and backend services on GCP with PostgreSQL. Parted ways amicably with my co-founder in 2024.

TECH: Python, FastAPI, PostgreSQL, GCP, Docker, OpenAI

2023 – 2024 (Stepped down)

Sr. Jr. Games

srjrgames.com ↗

Co-Creator & Developer

- Game Studio & AI Asset Workflows:** Co-founded indie family game dev studio; published Pigeon Revenge and technical guides on AI-driven sprite animation generation and Cursor for Unity.

TECH: Unity, C#, Astro, Generative AI

2025 – Present

EDUCATION

Higher School of Information Technology and Management

"COPERNICUS"

Computer Science

2007 – 2009 · Wrocław, Poland

University of Wrocław

Archeology

2001 – 2003 · Wrocław, Poland

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Amazon Web Services (AWS)

Issued 12.2019

Mobile Web Specialist

Google Developers

Issued 01.2019
